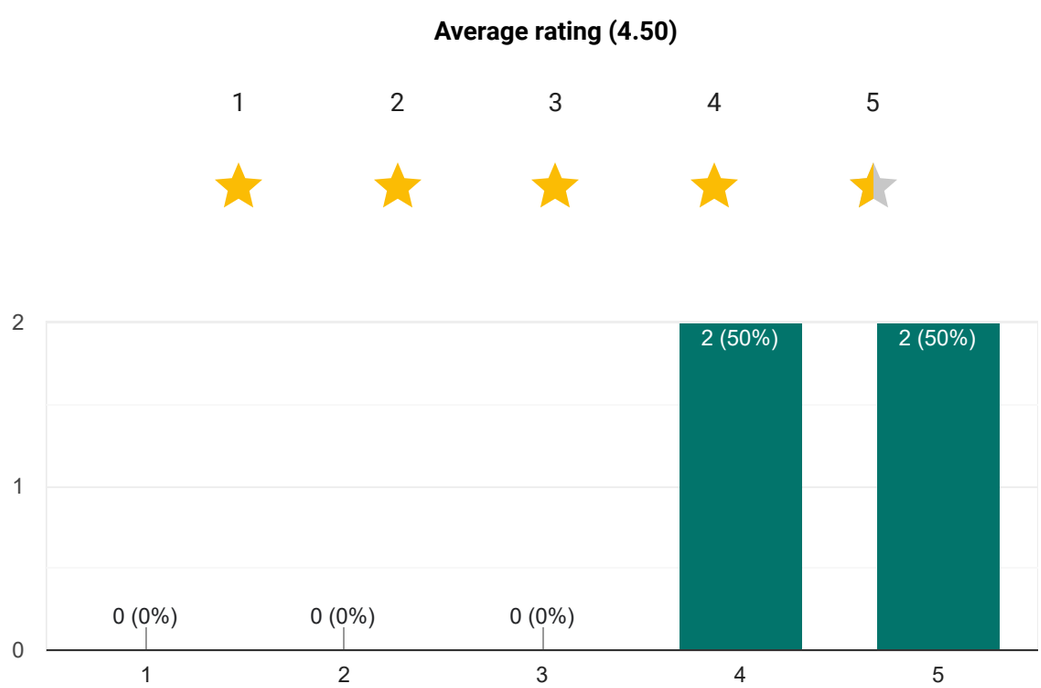
Overall Feedback

Overall Satisfaction about the Dashboard

Copy

4 responses



What do you like most about the Dashboard?

4 responses

The intention is very clear, it is immediately visible what it is made for and easy to understand the data.

There are buttons that help me switch easily between different data graphs. I can also access the historial data table easily through a link. Overall, I think what I like most is the dashboard's user-friendly interface.

That it works and does what it's supposed to do

that it is very clear an easy to use

What improvements would you suggest?

4 responses

Honestly all i can think about is make the interface a little more colorful. Maybe add some green since it is made to work for a greenhouse.

Instead of putting an alert at the bottom of the page, I think it would make the dashboard even more helpful if you could make a pop-up alert or send an email/text message to the user.

Usage of real time data and optimization via machine learning

maybe somewhere a instruction on how it works so if the user it for the first time or let anyone else use it they can read the that
